

**Commercial Fuel Delivery Trucks
Draft Tracks for Discussion
September 4, 2003**

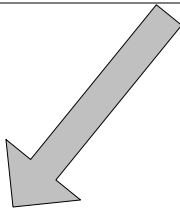

DRAFT

DRAFT

Common Requirements

- (1) Use of Verified Diesel Emission Control Strategies (VDECS)
- (2) Record Keeping
- (3) On or after December 31, 2006, new companies, or additional FDTs added to expand fleet size of existing companies shall have either:
 - installed Level 3 VDECS
 - a verified engine that emits no greater than 0.01 g/bhp-hr PM
 - is manufactured in accordance with the 2007 federal engine standard
- (4) New companies coming into the fuel delivery business after the adoption date of this section are placed in Track 1

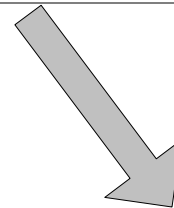

Track 1

By each compliance date specified below, the owner or operator shall ensure that the specified Percentage Fleet of Fuel Delivery Trucks meets one or a combination of the following :

- equipped with a Level 3 VDECS,
- verified engine that emits no greater than 0.01 g/bhp-hr PM, or
- manufactured in accordance with the 2007 federal engine standard.

- 25% Fleet by 2007
- 60% Fleet by 2010
- 100% Fleet by 2015

Track 2

By each compliance date specified below, the owner or operator shall ensure that the fleet-wide emissions for the FDT fleet is reduced by the specified percentages below. The reductions shall be based on the owner's or operator's Base Year Emissions Summary for emission year 2000.

- 45% by 2007
- 70% by 2010
- 90% by 2015
